The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the folding of the central seat relative to the driver's seat, the folding of the headrest, and the armrest for the passenger seat, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1,4 and 6, it is not clear from the specification and drawings that the seat cushion of the middle seat is foldably installed *in* the seat cushion of the passenger seat, and such appears misdescriptive. The same applies to the seatback being installed *in* a rear portion of the seat cushion. Note that the term "assistant" seat should be changed to "passenger" seat, for clarity.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, so far as definite, are rejected under 35 U.S.C. 102(b) as being anticipated by Kawade et al.

The patent to Kawade et al discloses all of the claimed structural limitations, including a middle seat having a foldable seat cushion (figs. 16,20), foldable back cushion (figs. 22,25,31), protruding portions on the back that may act as armrests for both a driver and passenger (fig. 22,25), and a folding headrest (figs. 33A,B, 35-37).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Curwen, Scully, Yadven, Fetter, Brennan, Charles, Shea et al, and Jovan et al show various features of the invention.
